**Village Patient COVID-19 Process**

1. If you have traveled in the last 2 weeks outside of the Bristol Bay Region or have been in close contact with someone who has traveled out of the Bristol Bay Region and are now experiencing fever, cough, shortness of breath, abnormal smell/taste sensation, loss of appetite or diarrhea contact your Health Aide.

2. The Health Aide will ask questions related to COVID-19 screening.

3. The patient will be scheduled at the clinic.

4. The patient comes to the clinic and is immediately put in a procedure mask.

5. The patient will be assessed by the Health Aide.

6. The Health Aide will consult Medical Staff for further evaluation and guidance.

7. Medical Staff will decide course of action.

7. If Medical Staff wants the patient to remain in the village and be tested the patient will remain in quarantine until the test is resulted.

8. Once a patient has been tested Bristol Bay Area Health Corporation will monitor that patient on a daily basis to ensure that the patient is in stable condition at home.

9. If the symptoms become worse the Health Aide must be contacted immediately.

**Village without a Health Aide**

1. **If** you have 2 of these three symptom-cough, fever or shortness of breath…

2. … **Then** call the Kanakanak Emergency Room 842-5201.

3. The Community Health Aide Program will take direction from Medical Staff.

4. If the patient needs to be tested Bristol Bay Area Health Corporation will coordinate the testing.
